from Passion to Impression

YONWOO

TUBE COLLECTION
Yonwoo is a comprehensive supplier of personal care and cosmetic containers. We provide ONE STOP service by providing a variety of containers and managing the colors and attributes of all packages with the same color and quality standards. Managing packaging specifications and standards is much more convenient for the customer and new versions of art or styles of package can reach the market with speed and on time delivery.

Quality Management System Certified by ISO 9001:2008
Environmental Management System Certified by ISO 14001:2004
Primary Packaging Materials for Medicinal Products Certified by ISO15378

A MANUFACTURER SPECIALIZED IN DISPENSING CONTAINERS FOR COSMETICS OF THE WORLD

www.yonwookorea.com
**Product Introduction**

### General Cap
- Most commonly used cap available in circular and oval styles.
- Optional outer metal cap anodized for a premium look.
- **APPLICATION**: Any type of cosmetic products.

### Flip-top Cap
- Flip-top cap that’s easy to open and close.
- Options available as standard flip-top or dual flip-top.
- **APPLICATION**: Perfect choice for products such as foam cleansing, body cleansing, body care, hair conditioner.

### Point Cap
- Cap for Long nozzle shaped tube heads.
- Various options of caps to suit different nozzle heads.
- Point cap option also available on Airless tubes.
- Optional outer metal cap anodized for a premium look.
- **APPLICATION**: Suitable for special care products such as spot and eye care treatments.

### Lip gloss Cap
- This cap is available as a cylindrical shape to fit an angled headed tube head for easy application of products to the lips.
- **APPLICATION**: Suitable for lip-gloss and other lip care products.

### Airless Pump
- This tube dispenses product using the airless pump mechanism.
- Easy dispensing system that allows minimal product left over in the tube.
- Optional additional decoration techniques for a premium look.
- **APPLICATION**: Ideal for premium priced formulations such as BB cream and sun block creams.

### Special Closure
- Tube products that offer an additional pad function.
- **APPLICATION**: Bi-treatment for skincare and make-up.

### Applicator
- Tube with innovation applicator heads.
- Applicators such as metal and silicone available.
- **APPLICATION**: Applicators would be suitable for eye cream, serum, etc.

- Yonnero has acquired the Luxe-Foil Technology, which provides a fantastic offer for luxury & pharma brands.
- Luxe-Foil is a form laminated tube.
- It is different from the original printed laminated sheet such as ABIL, PBL, that are then joined together.
- This product is produced by preprinted manufactured PE sleeves that are attached to laminated sheets and pressed out.
- Luxe-Foil retains its original shape unlike a laminated tube.
- Printing capabilities are the same as a PE TUBE.
- Good seal and smooth seamless when creased and cut (better than laminated tubes).
- Extreme product protection & high-quality decoration finish.

- PE material Tubes are available as 3, 5, or 6 layers tubes.
- 1 layer tube is LDPE, suitable for colour matching and soft surface.
- 3 layer tubes use the same PE material inner and outer layers.
- 1 layer construction is LDPE/ADMER/LDPE layer and it possible to apply different colour masterbatch between layers to achieve a particular colour or design.
- 5 layer tube has LDPE, ADMER, EVAL, ADMER, LDPE, and good block ability against air.
- It is great for sensitive & aggressive formula, less preservatives, oil, etc.

Comparison of laminate containing different barrier materials (Entry: PE Tube, AL, LDPE)

Excellent barrier for moisture & oxygen, Almost close to Zero.
LDPE is the barrier material used for ordinary PE TUBE. AL, PEID provides the best barrier result.
Yonwoo Thinks;

Needs from Customers
Provide the product & the customer wants, at the moment the customer needs it, with the brand image desired by the customer.

Demands from Consumers
Focus on the development of container considering the convenience and safety of the end consumer while optimizing the function of the contents.
